MISSION GROUNDWATER

Recharge . Conserve . Sustain

Date- 1/9/2023

The Director
MIT Academy of Engineering,
Alandi road,
Pune - 412 105, Maharashtra (India)

Dear Sir,

Greetings!

This is to certify that Mr. Ajay Borade has completed internship in our social sector organization from 29-05-2023 to 31-07-2023

During the time frame, he has been a sincere, knowledgeable, hardworking and a thorough professional. Below are the key projects he has worked on successfully:

- During his tenure at our organization, he has undertaken several fieldworks in and around Pune, Maharashtra to study and map rainwater harvesting structures and natural recharge areas.
- He has successfully prepared modifications and improvements in the diagrams of rainwater harvesting typologies suitable for the urban areas.
- Detailed rainwater harvesting potential study was undertaken by him at Army Public School, Khadki and diagram of filtration pits were prepared as per specifications.
- Designing of stormwater filtration pit for Dada Gujar percolation pond at Mohammadwadi, Pune.
- Survey of water bodies at Alandi town and mapping the same on the GIS platforms.

We wish him all the best in his future academic and professional pursuits.

Sincerely,

Ravindra Sinha
